Picnic Areas

When there is a low tide and a slight swell, you can walk out onto the intertidal rocks and watch marine creatures such as sea star, tide pools, worms, crabs, muddy shoals, rock crevices and seaweed. There are also many seaweeds to be found and a range of land and sea animals to be observed. If you want to know more about them try the Great Australian Bight Marine Park Management Plan. There is also a lookout area at Waterman extending from Little Island to Warman Point. This is a good place to visit if you want to know more about the marine life of the area.

Animal Exercise Areas

The park is a great place to catch rock lobsters, abalone, crabs, eels, and seagrass meadows.
