Message from the Mayor

The City of Joondalup prides itself on being the home of a highly liveable and active community with strong interests in the ongoing safety and security of its residents and visitors.

Community safety and crime prevention activities have a long history at the City, with many initiatives existing prior to the introduction of Community Safety and Crime Prevention Plans to formally guide our programs and services.

With many great successes over the years and a penchant for innovation, the City is now well placed to apply a bold and ambitious “towards zero” philosophy to its future crime prevention initiatives.

Such a philosophy is achievable through increased community involvement and the development of strong external partnerships that encourage shared responsibilities between the community and service providers.

By empowering the community to take an active role in the development of safer environments, our “towards zero” vision can be achieved with more efficient and targeted resources that benefit the community as a whole. We should all play our part to reduce crime by increasing our individual responsibilities and collective contributions to local safety initiatives.

It is my pleasure to drive this bold ambition through the adoption of the City’s new Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime and to facilitate ongoing engagement and dialogue with the community in achieving our aspirations.
Building a safe and responsible community is a key objective for the City of Joondalup. Achieving this requires effective planning, research and project management in partnership with the community and key stakeholders to encourage active participation and ownership. By facilitating stronger relationships and more effective communication, resources will be well-targeted and reflect the needs and concerns of the local community.

The City’s new Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime aims to identify the key areas for future investment and development in responding to crime and safety issues present within the community. It acknowledges the diversity of programs and services currently delivered or supported by the City, whilst also highlighting the strategies necessary to achieve broader strategic objectives contained within Joondalup 2022.

This focussed approach builds direct alignment with higher level strategic documents and leverages existing community knowledge and expertise in the Plan’s development. If effectively implemented the Plan will enable the community to demonstrate leadership; develop an awareness and understanding of safety issues; ensure services are delivered in the areas of greatest need; and that emerging trends are identified and responded to effectively.
Community Safety and Crime Prevention

The terms “community safety” and “crime prevention” have formed part of the local government vernacular for many years. Put simply, they describe the complementary role played by local governments in enabling residents and visitors to pursue their lives without fear or hindrance from crime or anti-social behaviour. As infrastructure builders, land-use planners and community developers, local governments sit at the interface of many key community safety and crime prevention areas. Policy mechanisms to address these areas are predominantly prevention-focussed and often involve partnership arrangements with community and government organisations.

These collaborative programs generally require support and assistance from the City, whilst new initiatives are developed in consultation with the community and stakeholders and can be fully or partially funded by the City. Initiatives such as patrol services and public infrastructure development are examples of major programs delivered and predominantly funded by the City. Education and community programs are often areas that are managed by external organisations and are supported or promoted by the City.

The City has been formally planning for community safety and crime prevention since 2009. This is the first review of the City’s current Community Safety and Crime Prevention Plan 2009-2011.
Crime and Safety in the City

The demographic profile of the City indicates a higher proportion of younger age groups (0–17 years) and a lower proportion of older age groups (60+ years) than the Perth Metropolitan average. Its residents are generally well-educated and earn higher than average incomes. Of particular note, over 37% of the City’s population were born outside of Australia and of that number, 18.5% were born in the United Kingdom.

Over 4,000 people in the City require assistance for recognised disabilities and 17% of the City’s total population engage in volunteering to contribute back to the community.

In addition to demographic data, the City is also experiencing significant growth within its City Centre, due to expanding health and education campuses and retail, commercial office and residential development. With this development come new challenges for the City in ensuring that emerging community safety needs are identified and addressed.

In the past, the City has responded to community safety and crime prevention needs in the following key areas:

- Graffiti removal
- Closed Circuit Television (CCTV) management
- Youth engagement
- Community patrols
- Community education.

It is anticipated that these areas will remain as priorities for the City with a focus on developing existing programs and initiatives further.
Developing the Plan

Phase One

The Community Safety Crime Prevention Plan 2014-2018 was the first matter considered by the City’s recently established Strategic Community Reference Group. The Group was formed by Council to provide advice on matters of significant community interest and strategic initiatives as required. Membership consists of up to three Elected Members, one community representative per ward (appointed for a two year tenure, based on an expression of interest process) and up to four temporary positions for qualified professionals or experts.

The first Strategic Community Reference Group meeting was held on 4 February, 2013 in which members considered the review of the Community Safety and Crime Prevention Plan 2008-2011. Members were asked to:

- Comment on the continued relevance of current themes in the Plan
- Identify areas of improvement in structure and approach
- Identify potential gaps or issues
- Comment on the alignment of objectives in Joondalup 2022 as they pertain to community safety and crime prevention
- Draft a compelling message in 25 words or less on a future direction for community safety and crime prevention within the City of Joondalup.

From this meeting, the City received advice on the following key priority areas for community safety and crime prevention going forward:

- Increased focus on the use of CCTV within the City as a tool for deterrence and evidence gathering
- Opportunities to add further value to the City’s community safety patrol service (City Watch) in evidence gathering and providing targeted patrols
- Opportunities for better leveraging the community to connect and engage on matters relating to community safety and crime prevention
- Demonstrating leadership in new community participation models
- Utilising social media for enhanced communication methods
- Greater communication with the community on emergency management issues
- Broader focus on vandalism than just graffiti

Based on the advice provided by the Strategic Community Reference Group and the existing direction on community safety and crime prevention outlined by the community in Joondalup 2022, the City developed a draft Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime.

Phase Two

The public consultation process was conducted over a period of 21 days between September and October 2014. Residents and stakeholders were encouraged to provide comment on the Plan. Advertising of the draft plan was provided in the Joondalup Voice and on the City’s website throughout the duration of the consultation period. The City received no submissions as a result of the community consultation process.
Planning Integration

The Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime is predominantly informed by the City’s Strategic Community Plan 2012-2022: Joondalup 2022. The structure and content of the previous version of the Plan was based on direction provided in the Western Australian Preventing Crime: The State Community Safety and Crime Prevention Strategy 2004-2007. Given that this Strategy has expired, the City has focussed its new planning direction on feedback from its community and stakeholders and has taken into consideration broader objectives through current State Government funding priorities, namely:

Crime Prevention Fund
- prevention and early intervention to address the needs of children and families
- youth justice and reducing re-offending
- preventing and responding to antisocial behaviour
- addressing and reducing drug and alcohol related crime

Community Safety Fund
- Security device programs
- CCTV for hotspot locations and technology supporting CCTV

State Graffiti Fund
- Encouraging and supporting communities to take responsibility for graffiti clean-up
- Providing sustainable local graffiti clean-up solutions in Western Australian communities
- Improving the use of public spaces by reclaiming areas that have been vandalised with graffiti
- Increasing community awareness on reporting graffiti vandalism
- Supporting projects that decrease the number of juveniles who come in contact with the justice system.

From its own Strategic Community Plan 2012-2022: Joondalup 2022, the following objectives and strategic initiatives have provided guidance on the development of a new Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime.

Community Safety

Objective:
For residents to feel safe and confident in their ability to travel and socialise within the community.

Strategic Initiatives:
- Imbed safety principles into asset management and design.
- Build a community that works in partnership with government and non-government organisations to achieve real and long lasting improvements in safety and wellbeing.
- Build a healthy community that is aware of and responsive to current public health risks.

Community Spirit

Objective:
To have proud and active residents who participate in local activities and services for the betterment of the community.

Strategic Initiatives:
- Support and encourage opportunities for local volunteering.
- Promote the sustainable management of local organisations and community groups.
- Deliver a program of community-based events and education that encourage social interaction within local neighbourhoods.
- Promote and support the needs of disadvantaged communities.
- Support and facilitate the development of community leaders.

The diagram illustrates how Joondalup 2022 provides broad strategic direction for the City’s informing strategies (of which the Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime is one) and how key actions contained within these strategies are then fed into the City’s 5-year Corporate Business Plan.

The Corporate Business Plan provides the basis from which to forecast resources in the Workforce Plan and Asset Management Plan, which are then modelled in the 20 Year Strategic Financial Plan in terms of their long-term financial impacts.

The Annual Plan details the specific milestones against these actions for the current year, which is accounted for in the City’s Annual Budget. Progress against the Annual Plan is then reported to the community and stakeholders through the City’s Annual Report.
“Towards Zero” Vision

Achieving the objectives of the Strategic Community Plan 2012-2022, (as they pertain to community safety and crime prevention initiatives), requires a bold approach by the City.

It will involve new ways of engaging the community in local crime prevention activities to increase participation levels and improve perceptions of safety amongst residents and visitors. This whole-of-community approach will also require greater partnerships to facilitate the ongoing reduction of crime and the creation of safer environments within an affordable range of resources.

To underpin these objectives, a “towards zero” vision has been incorporated into the Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime, to drive collaborations between the City and its residents and partner service providers.

Vision

‘We are a City that values strategic and bold approaches to crime prevention and the safety of our citizens.

We have a zero tolerance approach to crime and provide facilities, partnerships and infrastructure to establish safer environments within our community.

We harness the enthusiasm and commitment of our local community to add value to City programs and drive sustainable grass roots changes to behaviour and safety perceptions.’
Based on the input and feedback received from the community and after taking into consideration the City’s existing relevant objectives, the following key focus areas have been developed for the new Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime.

- Partnering for Safety
- Safe Places and Spaces
- City Safety Services
- Community Safety Awareness
Key Focus Area – Partnering for Safety

Community safety and crime prevention is an area of policy that attracts resources, services and responsibilities from a diverse number of stakeholders. This can extend to State and Federal Government Departments and Agencies, local community organisations, not-for-profit groups, businesses, health and education institutions and local government.

A key stakeholder for the City with regard to partner organisations is the Western Australian Police (WAPol), who are broadly responsible for law enforcement, data collection and analysis and crime prevention strategies. The City will actively engage with WAPol in its new policing model in joint operations and joint intelligence analysis to further the vision of “Towards Zero”.

By establishing and managing strong relationships with partner stakeholders, the City will be better placed to reduce duplication, improve its supporting role and maximise community safety outcomes for residents and visitors.

Build a community that works in partnership with government and non-government organisations to achieve real and long lasting improvements in safety and wellbeing.
# Objectives and Strategies

<table>
<thead>
<tr>
<th>Objective</th>
<th>Strategies</th>
<th>Key Projects</th>
<th>Measures</th>
</tr>
</thead>
</table>
| Identify and support current external government programs that promote community safety and crime prevention. | 1. Develop and maintain a database of current government programs which promote community safety and crime prevention.  
2. Identify new Government or community based programs to support as a component of the City’s community safety and crime prevention initiatives.  
3. Develop coordinated approaches and regular reviews with State Government agencies to deliver community safety programs at the local level, taking into consideration the following factors:  
  - Funding and resourcing arrangements  
  - Property access logistics (e.g. for graffiti removal)  
  - Enforcement responsibilities  
  - Delivery of community education programs  
4. Support the WA Police in developing and implementing a multi-agency response model to local anti-social occurrences, where the City can provide relevant support services to assist Police *.  
5. Utilise memorandums of understanding to guide partnerships with the WA Police regarding information exchanges and project delivery responsibilities. | • Neighbourhood Watch  
• Eyes on the Street  
• Burglar Beware  
• Make Your Mark  
• Independent Security Reviews  
• E-watch Program  
• Joondalup Liquor Accord  
• Graffiti Removal (including Main Roads WA and Western Power)  
• Joondalup and Wanneroo Homelessness Action Group  
• School Watch Program  
• Juvenile Justice Team Graffiti Referral Project (Restorative Justice). | Database developed and maintained by December 2014.  
List of programs supported by the City listed each year in the City’s Annual Report.  
Program successes measured by:  
  • Graffiti removal targets met  
  • Participation numbers in Programs.  
Current MOUs in place, which are reviewed every 3 years. |

*New strategies aligned to the “Towards Zero” vision.

|                       | 15. Define internal responsibilities for liaison with community groups in the delivery of community safety and crime prevention initiatives. | Internal responsibility matrix established by December 2014. | |

*New strategies aligned to the “Towards Zero” vision.
### Key Research Projects

Work collaboratively with stakeholders to collect data and exchange information and ideas.

### Strategies

16. Develop coordinated strategies with key stakeholders through participation in:
   - Bi-monthly information sharing meetings with the City of Wanneroo and WA Police
   - Metropolitan Community Safety Network between local governments and the WA Police
   - Attend WA Police Graffiti Networking forums
   - North Metropolitan Community Boating Group (NMCGB)
   - Local Emergency Management Committee to plan for and manage emergency and disaster events and support community recovery.
   - Joondalup Liquor Accord.

17. Collect local data to support comprehensive statistical understanding of criminal activities for the WA Police, including City Watch requests, graffiti removal activities, etc.

18. Exchange information with the WA Police on relevant incident reporting and the provision of CCTV footage in accordance with the Public Areas Video Surveillance system operation and Management Protocol.

19. Share information with other Agencies operating CCTV in public spaces or on public assets to maximise community safety benefits of these systems.

### Key Stakeholder Databases

- Goodbye Graffiti Database
- Graffiti forums
- Executive Dashboard
- City Watch customer service requests
- Graffiti removal customer requests
- Public areas CCTV customer requests
- Designing out crime review customer requests.

### Measures

Participation by City staff at Metropolitan Community Safety Network meetings.

Access for WA Police to CoJ community safety data is maintained.

Number of occasions per annum CCTV images are provided to authorised investigative agencies.

Networking opportunities undertaken.
Key Focus Area – Safe Places and Spaces

As a large local government organisation, the City is responsible for significant areas of public open space ranging from parks, urban landscapes, pedestrian accessways and local bushland and coastal reserves. Within these landscaped and natural areas, many infrastructure assets are installed and maintained by the City for the use and enjoyment of the community.

In designing, integrating, installing and maintaining these assets, the City must take into consideration any potential issues that may impact on the safety of users. It is intended that by creating and encouraging the use of safe and open spaces, the community will establish a sense of ownership of these areas and contribute to the overall responsibility for enhancing safety within the community.

Link to Joondalup 2022

Quality open spaces: To have urban and green spaces which are attractive, well-utilised and enrich the lives of the community.

Community Safety: For residents to feel safe and confident in their ability to travel and socialise with the community.

| Provide a range of recreational and engagement opportunities for the community to encourage responsible and healthy use of public space. | 7. Provide areas for recreation in public spaces that increase passive surveillance opportunities within the community. | • Battle of the Bands Competition  
• BMX, Skate and Scooter Competition  
• Youth Festival  
• Summer Sessions local youth events. | Maintain or improve community satisfaction with public open spaces. |
|                                                                          | 8. Conduct ongoing events and programs at vulnerable or at-risk public space locations to deter opportunities for crime, (e.g. skate/scooter/BMX competitions). |                                                                                        | Minimum of 2 events held annually at vulnerable or at-risk public locations. |
|                                                                          | 9. Undertake regular safety audits to identify and address perceived safety issues in the public environment. |                                                                                        | Safety audits of key passive recreation assets undertaken every three years. |
Key Focus Area – City Safety Services

In addition to supporting externally managed programs and initiatives, the City is also responsible for the delivery of in-house services that contribute to improved safety outcomes for the community.

By providing in-house services, the City has the capacity to better tailor programs which address local issues and needs. Some of the major services delivered by the City (which can be defined as either statutory or discretionary in nature) include Ranger services, City Watch patrols, graffiti management and removal and youth engagement activities.

All of these services and programs contribute to crime prevention and increased community awareness and perceptions of safety within the City’s district.

Link to Joondalup 2022

Corporate Capacity: For the community to have confidence and trust in the City that it can deliver services effectively and transparently.

Community Safety: For residents to feel safe and confident in their ability to travel and socialise with the community.

*New strategies aligned to the “Towards Zero” vision.*
Key Focus Area – Community Safety Awareness

A major component of community safety and crime prevention is the development of public awareness around key safety messages. With awareness comes an increased community understanding of how to prevent and respond to safety issues and become actively involved in programs and activities that improve safety outcomes within the community.

Awareness programs are often diverse and managed by a variety of stakeholders. The City acts mainly as a facilitator for the distribution of information by others, however, specific local issues will also be developed and driven by the City.

Through planned events, activities, networks and engagement forums, the City is provided with many opportunities and mechanisms for communicating messages back into the community. Emerging opportunities, such as social media, will aid in widening the City’s current communication network and extend messages and information to more people.

*New strategies aligned to the “Towards Zero” vision.
Reporting and Review

In accordance with the City's Integrated Planning Framework, the new Community Safety and Crime Prevention Plan 2014-2018: Towards Zero Crime has a five-year outlook to align with the Corporate Business Plan.

Progress against the Plan will be reported to the Council and community through Annual Plan Quarterly Progress Reports and the final Annual Report.

A review of the Plan will be scheduled in 2017/18 in accordance with its final year of implementation.
