

CameraPark with EasyPark

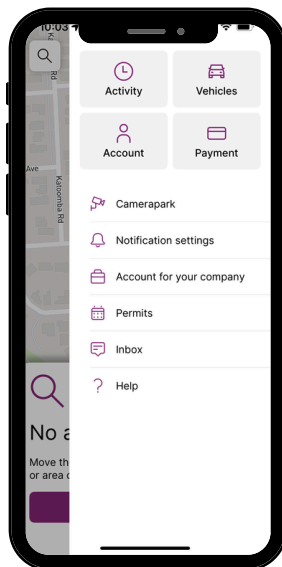

Park smarter, not harder.

Once you've activated CameraPark, our system recognises your car, starts your session when you arrive and ends it when you leave. It's parking made seamless. No need to touch any equipment or even your phone.

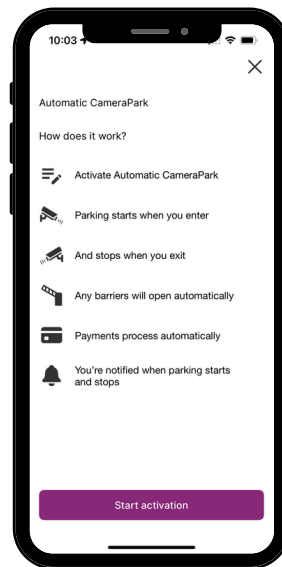

How you activate it

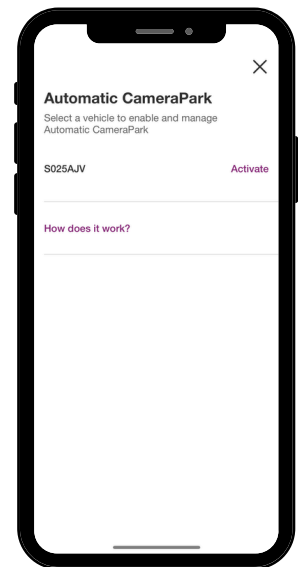

Download the EasyPark app.

Go to the menu and click on "Camerapark".

Learn more and start activation.

Choose your car and you're ready to go!

How it works

1

Drive in

Sweep into that perfect spot in the car park. If you've activated camera parking, you'll be notified when the parking has started.

2

Go about your day

Enjoy your time at the shopping centre, do your errands, or deliver that presentation. Your parking is in good hands.

3

Drive out

Simply go to your car and leave when you wish to. Your parking will automatically stop when you drive out. It's that easy!
