NB: It is worth noting however that all nurses named in the above table are "agency nurses" and as such tend to "come and go" with their employment status. However it is likely that for the duration of the tender that the above nurses will remain available. WANA has maintained a very active ongoing recruitment programme in response to increasing requests for nurses with Immunisation Certification and has been successful in increasing the numbers of nurses on the WANA data base with these skills by approximately a further 40 nurses.
