

# ADOPT A BUSHLAND

NAME

DATE

STUDENT ACTIVITY – YEARS FOUR TO SEVEN

## USES FOR BUSHLAND AND HUMAN IMPACTS

You may think that bushland is mostly there for the birds. Think again – there are many ways that bushland is used every day. Brainstorm as many uses for bushland as you can think of and write them below. Then share your ideas with your neighbour.

USES  
FOR URBAN  
BUSHLAND

The way bushland is used may have positive, negative or neutral (none or little) impacts on the environment. In pairs or groups of four, classify the bushland uses into one of the three types of impacts. An example is given for you.

Positive Impact	Neutral Impact	Negative Impact
	<ul style="list-style-type: none"><li>• Exercising e.g. walking along a pathway.</li></ul>	

### **In groups:**

- Discuss which uses have both positive and negative impacts.
- Discuss with your group how people can reduce the negative impacts.

### **In a pair:**

- Choose one negative impact.
- Design a poster which shows how people can reduce the negative effect on the environment.
- Use the space below to plan your poster.
