Rethink Helium Balloons

The City of Joondalup encourages the use of alternative options to helium balloons at events and celebrations to minimise environmental impacts.

Releasing helium balloons into the environment can harm wildlife such as birds and turtles that may ingest fragments or become tangled in the strings attached to the balloon.

Alternatives to decorate or attract attention at your party or event are flags, banners, streamers, dancing inflatables, bunting and bubbles.

Consider alternatives such as dancing ribbons, garden spinners, pinwheels, kites, chalk, painted rocks, native plant seeds or seedlings rather than helium balloons.
