

YOUR LEAFY CITY

Creating resilient, cooler and more inviting green urban spaces in response to a changing climate. Leafy streets will ...

REDUCE
the ambient air temperature

CLEAN
the air by absorbing polluting gases

REDUCE
the 'urban heat island' effect

PROVIDE
food and habitat for wildlife

IMPROVE
the visual amenity of a street

REDUCE
cooling energy consumption

CREATE
liveable communities for residents

CREATE
safer walking environments

YOUR LEAFY CITY

Since May 2017 the City of Joondalup has been implementing the Leafy City Program which aims to increase canopy cover by planting trees within the City's suburban streetscapes. This will create cooler, more inviting green urban spaces for residents and mitigate the increasing heat-island effect generated by existing hardstand surfaces.

When will the program roll out?

The next round of tree planting will commence in May through to August 2021 supported by the advice and planning of the City's arborist, landscape architects and traffic engineers. Residents will be informed prior to works commencing in their areas.

To find out more about the program visit joondalup.wa.gov.au or call **1300 369 972**.
