

# YOUR LEAFY CITY

Creating greener, cooler, and more comfortable neighbourhoods for everyone.

**REDUCE**  
the ambient air  
temperature

**CLEAN**  
the air by absorbing  
polluting gases

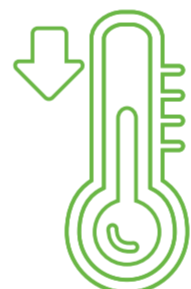

**REDUCE**  
the 'urban heat  
island' effect

**PROVIDE**  
food and habitat  
for wildlife

**IMPROVE**  
the visual amenity  
of a street

**REDUCE**  
cooling energy  
consumption

**CREATE**  
liveable communities  
for residents

**CREATE**  
safer walking  
environments

The City of Joondalup Leafy City Program provides increased urban canopy cover by planting trees within the City's suburban streetscapes, to create cooler, inviting green urban spaces for residents and mitigate the increasing heat-island effect.

The Leafy City Program launched in May 2017 and to date, over 4,500 new trees have been added to the urban canopy among the City's neighbourhoods.

**Where will the next program roll out?**

The next round of tree planting will occur along selected streets in the suburbs of Duncraig, Edgewater and Mullaloo. Suburbs receiving the Leafy City Program have been identified as 'hot-spots' via thermal mapping and tree-canopy surveying, with selection being supported by the advice and planning of the City's arborist, landscape architects and civil engineers.

**When will the program roll out?**

The next round of tree planting will occur between May through to August 2023. Preparation works on properties with hardstand verge surfaces will commence in April 2023. Residents will be informed prior to works commencing in their areas, and the City aims to work together with local residents to help create cooler inviting green urban spaces to live in for everyone.
