

Tree Information Sheet

Common Name

Liquidamber

Botanical Name

Liquidambar styraciflua

Origin

North and Central America.

Description

A large, fast growing deciduous trees, which can reach 25 metres high and spread to around 12 metres in ideal environments however they seldom grow beyond 15 meters high in street verge environments.

Liquidambers are probably best known for their spectacular orange, purple, red or yellow autumn foliage and are one of the few deciduous trees that show these colours in Perth's Mediterranean climate.
