

Tree Information Sheet

Common Name

Tuckeroo, carrotwood, beach tamarind or green-leaved tamarind

Botanical Name

Cupaniopsis anacardioides

Origin

Native to Western Australia and South Australia.

Description

Medium tree with a spreading canopy and glossy green large leaves. Within a streetscape environment the tree can grow between 8 - 12 metres high.

The tree has smooth grey-brown bark with raised horizontal lines and produces yellow-green flowers in spring followed by decorative orange-yellow seed pods in summer.
